

Integrations

Delivering a modern and seamlessly connected employee experience.

Bringing your business systems together is essential for optimizing efficiency, ensuring data accuracy, and maintaining a competitive advantage in today's dynamic work environment. With isolved, you get the flexibility and simplicity of extending your human capital management (HCM) solutions to meet the unique needs of your operation. Our approach ensures compatibility with other point solutions, allowing for seamless integration with your existing and future tools.

1 Flexible Connectivity

isolved is designed for seamless compatibility with various systems, integrating best-in-class HR tools and technology. It connects software and databases, enabling effortless communication between platforms.

2 Intuitive Configuration

Easily incorporate third-party add-ins, popular apps, essential connectors, and integrations. Whether it's people, benefits, tax, or brokerage services, isolved's unparalleled flexibility allows for infinite configurations, empowering you to create the perfect HCM solution for your business—both today and in the future.

3 Simplified Scalability

The isolved People Cloud platform is a cloud-based SaaS solution, with a continuous release cycle that ensures you always have the latest features and enhancements, no matter what. The platform even scales effortlessly to your evolving business, so you'll never outgrow it or need to upgrade.

Seamless integrations available in these categories:

- Job and/or demographic transfer to and from third-party HR or POS systems
- Auto import through SFTP for items such as pay data and cost centers
- ACH payroll payment for vendors such as 401(k), HSA, or wage garnishments
- Payroll journal and general ledger exports
- Benefit enrollment exports
- Employee decision election imports
- 401(k) integration – 180 or 360
- Health Insurance Carrier Connections
